Skin Needling... An Intriguing Skin Enhancing Therapy

Becky Malhum offers a unique way to help men and women rejuvenate their skin, and finds the removal of unwanted tattoos to be very rewarding.

Becky Malhum presented some interesting facts about restoring our skin to health, whether it be tattoo removal, permanent makeup, or healing/improving the skin we live in. She works with accident and cleft palate victims to improve their appearance by awakening the collagen (the main component of connective tissue), and jump starting its reproduction in a safe and effective way. Becky shared her wealth of knowledge on the subject of tattoo removal. The natural process she uses is the “Dermapen”, which opens the skin (no pain involved), and extracts the tattoo ink. This process is also known as “Skin Needling”. She shared how this has worked to change the lives of many people with a desire to remove tattoos. It even works to stimulate hair growth!

The Dermapen is also used to enhance tired skin; it will plump up fine lines and boost collagen production on any area that is needed. Becky can also effectively treat skin that has been scarred from injury, acne and even burns. Some people have even seen amazing results on stretch marks using this procedure!

Becky collaborates with doctors in skin care and skin rejuvenation and is super excited about the results she is receiving with the Dermapen. She can be reached for more information at 760-954-0976.
